

# DAY of AI India

Unlocking the Future with the Day of AI:  
Empowering Students for the AI-Driven World!

Launch Date: 13 December 2023

Venue: Room No. 15, Bharat Mandapam, Pragati Maidan, New Delhi 110001

Time: 5 pm – 6 pm

# The Day of AI

The Day of AI, an exciting initiative led by Massachusetts Institute of Technology’s Responsible AI for Social Empowerment and Education (MIT RAISE) programme, places the power of Artificial Intelligence (AI) education directly into the hands of K-12 students and their teachers. In a world increasingly shaped by AI, understanding this technology is crucial for everyone. The Day of AI is designed to demystify AI, foster creativity, and instil responsible use among students from any background or ability.

The Day of AI curriculum, meticulously crafted by leading faculty and educators from MIT RAISE, offers a captivating journey into the world of AI. Tailored for teachers with diverse backgrounds, this hands-on curriculum spans elementary, middle, and high school levels. Engaging activities encompass creative discovery, meaningful discussions, and critical thinking exercises, making AI education accessible to all, regardless of technical expertise.

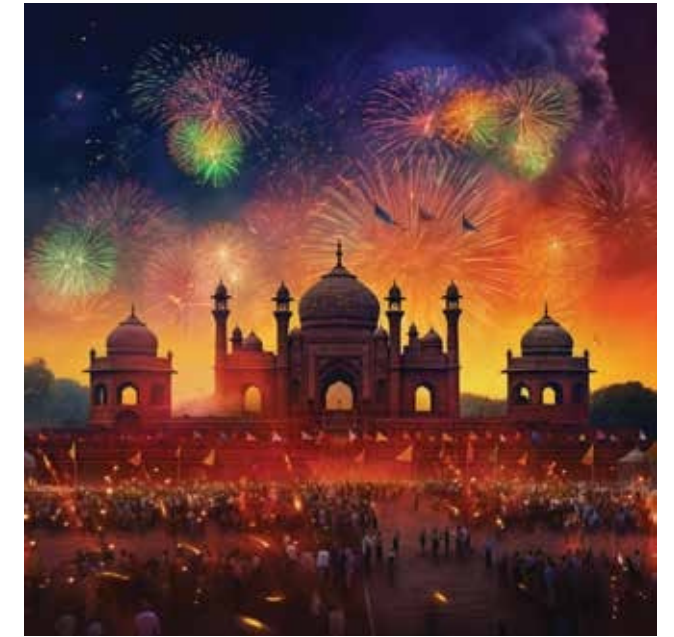

# The DAY of AI India

The Commonwealth Educational Media centre for Asia (CEMCA), the regional centre of Commonwealth of Learning, and MIT RAISE are launching the customised Day of AI curriculum in India to enrich its vibrant educational landscape. Recognising the critical need to introduce AI literacy at a young age, the Day of AI India is pioneering the way for students and teachers alike to embrace the transformative power of AI.

The Day of AI India focuses on Grades 3-8, targeting elementary and middle school students, providing them with a unique opportunity to explore the realms of AI and understand its profound impact on their lives. The curriculum aims to foster critical thinking skills, empowering students to make informed choices in the digital age. The curriculum can also be customised and adapted in different Indian languages.

To ensure a comprehensive approach, the Day of AI India aims to reach out to primary and secondary school teachers, acknowledging their pivotal role in shaping the AI literacy landscape. By providing teachers with the tools and confidence to teach AI, the initiative creates a ripple effect, spreading awareness not only in classrooms but also within homes through informed parents.

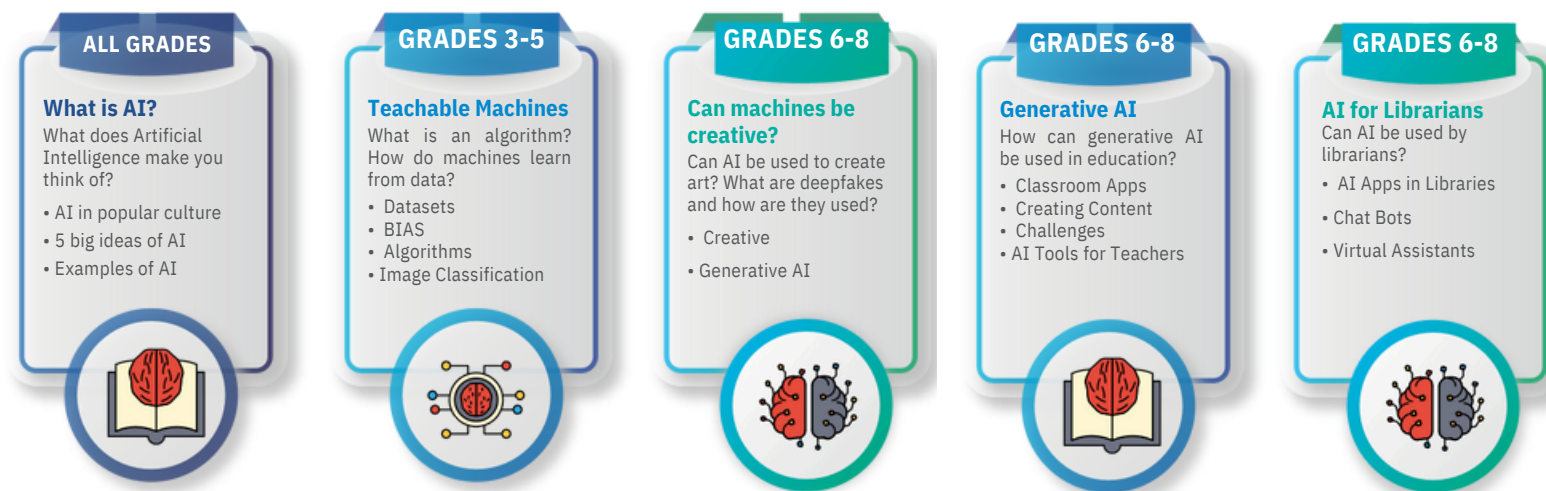

## Key Features of the Day of AI Curriculum:

Embrace the future with the Day of AI India!

## The customised curriculum for Grades 3-8 covers the following:

# DAY of AI India

Let's empower the next generation to not only understand AI but also shape a future where this technology is wielded responsibly and creatively.
